

# STUDENT ACCESS PROGRAM

Dear Dental Educator:

OraPharma, Inc. is proud to announce the ARESTIN® (minocycline hydrochloride) Microspheres, 1 mg Student Access Program for dental and dental hygiene programs. This program has been created after working with leading dental and dental hygiene directors to provide educational programming and hands-on training for locally administered antibiotics (LAAs).

The goal of this program is to align with the needs of dental and dental hygiene programs to provide hands-on training and clinical information to their students studying comprehensive periodontal disease treatment. To meet this goal, OraPharma developed this program to ensure that [senior dental and senior dental hygiene students have access to ARESTIN® for clinical use.](#)

Participating programs will be provided the following:

- One ARESTIN® Trial Kit, which contains 12 ARESTIN® cartridges for clinical use per senior student (Participating programs must supply list of participants)
- Access to a discounted ARESTIN® Handle for senior students (Limit: 1 per student)
  - [Special Pricing: \\$32.00](#)
  - [Retail Pricing: \\$49.95](#)
- Access to both Instructor and Student Education Kits, which contain valuable clinical and patient education information regarding periodontal therapy and ARESTIN®
- Access to demonstration product (Limit: 5 packs per school — 12 ARESTIN® demonstration cartridges per pack)
- Sample Patient Log and Performance Check Sheet

[The school is responsible for the cost of the discounted handles, as well as shipping and handling for all materials.](#)

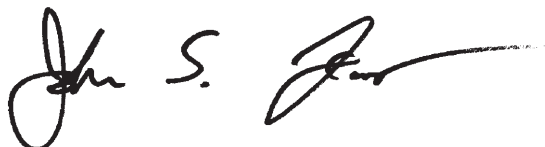

## [ARESTIN® STUDENT ACCESS PROGRAM QUALIFICATIONS](#)

- Accredited two- or four-year dental hygiene and dental school programs
- Implementation of ARESTIN® Trial Kits for patient care in a clinic setting. Ideal implementation includes a case study write-up, performance check, and tracking of patient with a tracking log
- Include instruction on the use of ARESTIN® in a periodontal treatment protocol
- Provide the license of the program director or appropriate point of contact

To enroll your school in the ARESTIN® Student Access Program, please complete the enclosed enrollment form and fax it to the number highlighted on the form. [Please use offer code: SCH](#)

If you would like to consult with an OraPharma representative to review the proper administration of ARESTIN<sup>®</sup>, please call 1.866.ARESTIN (273.7846).

Sincerely,

John S. Lenart

ARESTIN<sup>®</sup> Product Director

ARESTIN<sup>®</sup> (minocycline hydrochloride) Microspheres, 1 mg is indicated as an adjunct to scaling and root planing (SRP) procedures for reduction of pocket depth in patients with adult periodontitis. ARESTIN<sup>®</sup> may be used as part of a periodontal maintenance program which includes good oral hygiene, and scaling and root planing.

ARESTIN<sup>®</sup> contains minocycline, a tetracycline derivative, and therefore should not be used in children and in pregnant or nursing women. The use of drugs of the tetracycline class during tooth development may cause permanent discoloration of the teeth.

The most common treatment-emergent adverse events were headache (9.0%), infection (7.6%), flu syndrome (5.0%), and pain (4.3%). These occurred at a similar rate to SRP and SRP + placebo.

Please see accompanying full Prescribing Information.
